DEDRONE.COM

MISSION-READY AND SCALABLE

DedronePortable can autonomously detect, track, and identify drones and locate their pilots, providing reliable airspace protection in any environment. Powered by DedroneTracker.AI, this scalable solution provides swift operational readiness.

- **Rapid Plug-and-Play Deployment:** Mission ready kit enables reliable setup in under 15 minutes.
- **Scalable & Modular:** DedronePortable functions as a standalone system or seamlessly integrates with multiple DedronePortable units to create a networked defensive perimeter. It can also be used to support other Dedrone solutions, such as DedroneFixedSite and DedroneRapidResponse.
- **Compact & Weatherproof:** Robust design is easily transported, ideal for swift responses in challenging conditions.
- **Optional Starlink Connectivity:** Reliable, high-speed connectivity even in remote or challenging areas.
- **Robust Detection:** Optimized for reliable performance in urban settings and challenging RF-noisy environments.

RF-ONLY

RF-Detection Networked

- 3x cases, 15 min setup
- 3–6km range
- 1x RF-560 (advanced detection)
- 1x RF-360 (localization – line of bearing)
- 1x Tripod
- 1x Starlink
- 1x Battery
- Connectivity: Starlink

Set-up in less
than 15 min

Man
portable

Risk-based
prioritization

Supports layered
mitigation workflow

Completely
passive RF detection

Integrates with higher
level C2

TACTICAL BASE KIT

RF + Mitigation

- 6x cases, 15 min setup
- 3–6km range
- 1x RF-560 (advanced detection)
- 2x RF-310 (localization - line of bearing)
- 1x Mitigation solution
- 1x Laptop
- Connectivity: On-prem

TACTICAL EXTENDED KIT

RF + Mitigation + Radar + Optical

- **1x Base Kit plus:** 5x cases, 15 min setup
- 3–6km range
- 4x Radar panels
- 1x Camera
- 1x Tripod
- 1x Laptop
- 1x Server
- Connectivity: On-prem

There were no drones in our own possession or nearby that would not be detected by Dedrone. The start-up time and UI (user interface) of Dedrone is just excellent, the API is clear with Telegram Bot created in just one day.

ROMAN X., LEAD OF RADIO COMMUNICATIONS PLATOON

SIX G7 NATIONS RELY ON DEDRONE BY AXON

Dedrone by Axon continues to perform at the highest levels of efficacy at DoD and Civilian CsUAS test events. At our most recent review, DedroneTracker.AI's AI-driven image recognition and autonomous detection engine performed at an estimated 95% accuracy level.
